THE REAL DEAL

SNK's NEO-GEO is synonymous with state of the art video gaming entertainment. Behind all the fun is a hardware system so advanced it allows us to pioneer New Frontiers in video entertainment.

NEO-GEO is capable of displaying 4096 colors from a palette of 65,536 colors. The immense color palette allows for full motion quality images and without colors there could be no graphics. The 15 stereo sound channels (7 devoted to speech) literally intensifies the total game experience. In the past home video games had bleeps, and blips for sound. NOW, NEO-GEO's power pounds out full audio soundtracks and real voice speech. You can expect kicking music including every instrument imaginable in each and every NEO-GEO title. As for action, NEO-GEO can handle 380

sprites as big as 16x512 (for the biggest characters) or as small as 1x2 (for the finest detail) and this defines the term character POWER. With this character power, NEO-GEO has a seemingly unlimited capability for game play. Imagine enemies, power-ups, items, and allies. Every megagamer's dream come true, The Pro gear spec 330 Meg maximum information capacity (over 33 times the nearest competitor) allows for complex playfields, intricate musical

scores, previously unheard of storage potential, and detailed sprites and graphics. To top it all off, the processor speed of 12.5 Mhz eliminates nearly all of the flickering, slowdown, and "problems" seen on other gaming systems. All this raw power is driven and directed by custom-made SNK pro-chips only to be found on the monster of video games, the NEO-GEO.

All this, omni-directional scrolling, rotation, enlarging, shrinking, fade, and scaling is achieved by utilizing the same hardware and software found in our best selling Multi-Video System. This entire 330 MEG package of power (you never have to buy additions or a monitor to have a complete system) can only be from SNK Home Entertainment, Inc. And, when it comes to video games, there is only one thing to remember... NEO-GEO is the Real Deal.

LETTERS TO NEO-GEO

Dear SNK HOME ENTERTAINMENT, INC.,

I can't compliment you enough on the great job you've done creating the best video game system I've seen yet. Obviously you have blown away the competition competing with Nintendo, Sega, and NEC. Your games look exactly like the arcade games and I can't tell the difference. Good luck in the future.

Sincerely,
Erik Klemm
Newton, NJ

Dear SNK:

First of all, I thank you for making the BEST VIDEO GAME IN HOME ENTERTAINMENT HISTORY, "THE NEO-GEO". You don't know how it feels to play an action game at home that is exactly like the arcade which makes your hair stick out like getting electrically charged through your body and your hair gets spiked and hard like glue. I also thank you for sending me the NEO-GEO Magazine, I was very surprised when I got it and I could not believe my eyes when I saw the type of graphics some games had.

Metin Hatipoglu
Westin, Ontario, Canada

Dear SNK,

I recently purchased a NEO-GEO Gold System. I own a Genesis, SNES, NEC, NES, and a computer and spend lots of money on software. The NEO-GEO is far more greater than any other home system around. I saw your ad in my gaming magazine. My favorite game is Sengoku. Whoever designed it, I'd like to shake their hands.

My friends purchased a Genesis, a SNES, and NEC and none of them could compare with the NEO-GEO. They all come over and play Sengoku. NEO-GEO is Awesome. I'd just like to say you guys out there are doing a heck of a job, and I'd like to see more carts like Sengoku.

Sincerely,

Young Kim
Alex Virginia

Dear SNK,

I own the following video game systems; the NES, Sega Master System, and the Sega Genesis which I like very much. As much as I like these systems I can't tell you how much I praise the NEO-GEO!! My friend and I have played several versions of your NEO-GEO arcade and we love them all! I think, by far, the best game is Magician Lord. In my opinion Magician Lord is the most graphically realistic game I have ever played.

I would like to give my thanks to you for making it possible to play the NEO-GEO arcade with only one token. Each time we visit the arcade I find that most of the games that require more than one token are really not that exciting and fun than you expect from such a game. Your NEO-GEO is the arcade that my friends and I put our money into most often. Your NEO-GEO home system is a very powerful gaming system that every system I know pales in comparison to the advanced entertainment system.

Tim Carlock

Hey Guys,

I really enjoyed your article about your Neo-Geo, it really made me sit up and think. I have owned the Nes and the Turbo, and I currently own the Sega Genesis and Super NES. I bought the Super NES yesterday. But today, after reading your article, I realize these systems are underpowered and that you are getting less for your money. Your cost per Meg. comparison is really informative. I've been playing the Neo-Geo for about a year now, and to tell you the truth, I always knew it was the best, oh yeah, I played it in the arcades.

I'm kicking myself for not getting the Neo, I put about \$250 into the NES, about \$400 into the Turbo, about \$1800 into the Genesis, and around \$300 into the SNES. I knew these systems had software support. I never knew you did. Also, I'm a big football fan. I see you've got a football game coming out. I'm excited. Well, I'll stop for now. Keep the games coming and I'll have your system Christmas of 92. Keep up the great work.

THE GAME LORD SPEAKS

SNK Home Entertainment, Inc. has been setting new standards in video games since the release of the untouchable NEO•GEO. This advanced new technology has sparked some of the greatest new software available and cannot be denied of the licensees it deserves. In the year that has passed, SNK devoted much time to 11 new third party software companies and nearly 100 new SNK programmers to ensure that NEO•GEO software would not falter. We knew that in the long run, these licensees would become the new leaders in software and you, the megagaming NEO•GEO fanatic, would only benefit from this strategy.

Now, the Third party licensees have come of age and will be putting out tremendous titles such as Andro Dunos, Viewpoint, and Ninja Commando. Without the worry of assisting the third party licensees, SNK has the time and man power to work on the long awaited high Meg games. Games that not only finally tap into the power of the NEO•GEO,

MAX 330 MEGA

but games that will break boundaries in memory, gameplay, playfields, and depth. Games that will only be found on the only professional home system, NEO•GEO.

By the fourth quarter of 1992, NEO•GEO will have the software titles that reach a plateau which other video game systems can only dream of reaching. This new software is commonly coined "second wave software". NEO•GEO's second wave software will have intricate gameplay and complex playfields, including more character abilities

than ever before seen. The new software will be involved and intense and these games will use a monumental amount of Megs. High Meg games are what you have all been waiting for.

Meg is a measurement of information and without it, the high powered NEO•GEO could not be fueled. You already know what's under the hood of a NEO•GEO and now, SNK will show what it can do. We have the time and power to blow the doors off the other systems.

Imprinted on the hood is: NEO•GEO, Max 330 Mega, Pro-Gear Spec, and Advanced Entertainment System. Let's backtrack. Advanced Entertainment System means Monster of video game systems. Pro-Gear Spec means professional gear specifications. Max 330 Mega means capable of 330 Megs maximum and NEO•GEO means when you want the best game system in the world. **Quality is what you can expect...from SNK Home Entertainment, Inc.**

Dear Game Lord:

Looking for a game with so much heart-pounding, palm-sweating action that you just can't stop playing it? Then **Soccer Brawl** for the Neo-Geo is for you! Soccer Brawl is a cross between indoor soccer and Street Fighter II. Like a traditional soccer game, the object is to score more goals than your opponent. But that's where tradition and Soccer Brawl part company. Armed players make Soccer Brawl more exciting than any mere sports simulation. Players can power-up for a super shot when on offense, blast members of the other team when on defense. Shoulder tackles and sliding tackles are also a part of your defensive repertoire.

There are eight teams to choose from and every team has their own Power Shot - a weapon of the team's Head Master (team captain). When the Head Master is powered up, he can unleash a Power Shot that rockets towards the opposing goal, unleashing destruction on anyone that gets in its way.

Soccer Brawl has a difficulty setting for any level of player, and you can play against the computer or a friend. When you've gained some skill, try your luck in the seven-round tournament. Any way you play it, Soccer Brawl has the most pulse palpitating action of any sports cart to date.

Dear Game Lord:

Thank you for making **2020 Super Baseball**. I have not been able to stop playing since I first brought it home. 2020 Super Baseball is the game sports fans have been waiting their whole lives for. The gameplay and graphics are simply incredible. The true scaling and rotation in 2020 Super Baseball make Nintendo's Mode 7 look like child's play. The graphics and motion make you feel like you are at the ballpark. But graphics presentation are only half the package. Baseball 2020 offers so much more than a "regular" baseball game. The addition of landmines as the game progresses make a routine fly ball an adventure. The jump zones on the warning track give a new meaning to the term "a leaping catch." Change pitchers, pinch hit, steal, bunt, and construct new players, it is all here. Baseball 2020 also gives you much more. Each player has individual ratings in several categories. You can ricochet hits off of the walls and barriers, make diving catches, and listen to the incredible sound. Too bad Nintendo and Sega, Neo-Geo has proven once again that it is the real deal.

Dear Game Lord:

SNK has combined the one-on-one martial arts action of Street Fighter II with the down-and-dirty street tactics of Final Fight to create a game better than either in **Fatal Fury**. You can choose from three unique fighters and journey from city to city, defeating the top warriors in the world en route to Geese Howard, the "King of Fighters." Along the way, you'll encounter bonus stages where you arm wrestle a hulkster for bonus points. In the two-player mode, you and a friend first take on the computer and then each other in a fight to see who gets to continue playing. The characters are huge, and the special attacks awesome-like Burning Knuckles and the Hurricane Uppercut. Fatal Fury is head-to-head fighting at it's best!

HUGE LEVELS!!

Boss One!

For the level two boss, you stay to the far left, or you will be flamed by the boss. It packs a mean flame thrower that almost reaches across the screen. It also launches deadly plasma leeches.

Boss Two!

In the Factory of Death, you will come across the majority of the alien armada. Many booby traps are strewn throughout this maze! Two mini-bosses will attempt to stop you, but press on. The Fourth Boss is actually very simple to defeat, but the journey to it is extremely difficult. After Level Four, prepare to thwart the alien's Last Resort in Level Five!

Boss Four!

To take on this destructive boss by blast the laser turret on its torso. This is its only weak point, and large laser blasts issue forth from it every three or four seconds. Time your shots wisely.

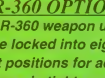

The third level boss is so large it doesn't fit on one screen! Attack its legs to make the vulnerable torso fall to the ground. Again, the laser turret is its only weak point. Watch out for the blasts!

BASEBALL STARS

It's that time of year again. Time for the trips to the park. Time for the crowds, hot dogs, peanuts, and cracker jacks... I don't care if I ever get back. That's right, Baseball season is upon us and whether you are an arm-chair athlete or a diehard

diamond fan, you can't help but be impressed by Baseball Stars 2.

Not only does Baseball Stars 2 incorporate the best graphics seen on a home game and real voice announcing as heard in the original, this game has much more. A unique split screen is used when base runners are present. The bottom third of the screen will show the base runners in full size as they fly down the base path, allowing for an accurate base runner position. Also, every current batter has his own baseball card quality profile which

includes his individual batting stats. The mug shot of the batter and the pitcher will remain on the screen during the "up at bat". As in 2020 Super Baseball, close-ups of the

outstanding plays can only be expected from NEO•GEO. And what else would baseball be without a good pitcher-batter fight. The camera will zoom in to get the best shot of the crowd pleaser. The boys of summer are back in the long awaited sequel of sequels, Baseball Stars 2.

Baseball Stars 2 is the first of the "second wave software" and it is what you have all been waiting for. Unbelievable graphics only seen in the arcades and, of course, here on NEO•GEO, fluid animation, and NEO•GEO real voice speech make this the greatest baseball game ever! Unmatched in every aspect, this

Temper, temper!

game cannot be passed up. Baseball Stars 2 will definitely be talked about for years and with the added attraction of two player simultaneous competition, your friends will never let you put this in the old games box. Only games of this magnitude are billed, "The Game Lord's Pick of the Month!".
